

NUTRIENT DENSE, ALL-WEATHER SUPPLEMENTS

Feed in a Drum® supplements are formulated to address basal diet deficiencies, typical in both grazing and harvested forage feeding situations. Each Feed in a Drum® supplement is designed to provide proper levels of protein, vitamins and minerals to help support maintenance, growth, lactation and reproduction.

Feed in a Drum® supplements are supported by extensive university research and produced through a patented manufacturing process that provides a self-fed, controlled delivery system which allows for nutrient absorption throughout the day.

THE FEED IN A DRUM ADVANTAGE

RESEARCH DRIVEN

- University research-proven Feed in a Drum® supplements ensure the best animal performance results.
- Specially formulated and fortified with essential nutrients, Feed in a Drum® supplements support all stages of animal production.
- Year round feeding applications allow producers to develop programs that address specific basal diet deficiencies.

PERFORMANCE FOCUSED

- Predictable consumption makes Feed in a Drum® easy to manage, with less waste, and lower supplement feed costs.
- On-time nutrient delivery means cattle get what they need, when they need it.
- Quality assurance responsible manufacturing provides producer peace of mind.

FIELD PROVEN

- Flexible packaging options and sizes meet the needs of any operation.
- Strategic placement of Feed in a Drum® supplements can assist with pasture management.
- Self fed & convenient Feed in a Drum® supplements save time and effort versus other supplement feeding options.

UNIVERSITY RESEARCH PROVEN – SUCCESS DRIVEN

RESEARCH DRIVEN SUPPLEMENT SOLUTIONS

Targeted university research, advanced manufacturing technologies and precise product formulations has made New Generation Supplements® an industry leader in the development of advanced livestock feed supplements.
